

INVESTOR PRESENTATION • 2026

The Professional Network Built for Healthcare.

Locumfy unifies hundreds of thousands of medical professionals across nursing, therapy, and physician disciplines into one intelligent career platform — powering jobs, connections, timesheets, insurance, and data-driven recruitment at scale.

THE PROBLEM

Healthcare Talent is **Fragmented**

Medical professionals bounce between dozens of siloed job boards and staffing portals, while healthcare facilities struggle to find, verify, and engage qualified candidates.

Siloed Platforms

Nurses, therapists, and physicians each have separate portals — no unified identity or cross-discipline discovery for career-minded medical professionals.

Resume Chaos

Resumes are manually reformatted — inconsistently and repeatedly — every time a candidate is submitted to a new hospital or facility. This wastes recruiter hours and introduces errors.

No Engagement Layer

LinkedIn is generic. Medical professionals have no career-specific social network for news, peer connections, and verified credentials in one place.

WHY NOW

86,000

Projected US physician shortage by 2036 — demand for flexible, contingent staffing keeps rising. [AAMC ↗](#)

\$56K+

Average cost to a hospital of every RN who turns over — retention and faster placement are board-level priorities. [NSI Report ↗](#)

~90%

Share of US healthcare facilities that used locum tenens providers in the past year — contingent clinicians are now core infrastructure. [CHG Healthcare ↗](#)

Mobile-first

A younger clinical workforce expects consumer-grade apps for jobs, credentials, and pay — and no incumbent delivers it.

THE SOLUTION

Introducing Locumfy

A LinkedIn-style platform purpose-built for healthcare — with verified credentials, AI-powered resume parsing, automated anonymization, job matching, built-in timesheets, per-diem insurance, and a professional social graph for medical careers.

Professional Network

Connect across disciplines. AI-suggested links based on shared employers, schools, and specialties.

Unified Job Search

Internal and external positions across all Jackson brands surfaced in one intelligent feed.

Digital Timesheets

Mobile-first timesheet submission and approval — eliminating paper and manual billing delays.

Verified Data

NPI database integration auto-populates licenses, DEA, Medicare numbers, and state credentials.

PLATFORM ARCHITECTURE

One Platform. Two Experiences.

A native mobile app for professionals on the go, and a full web portal for facilities, recruiters, and administrators.

Mobile App — For Professionals

- ✓ Profile with verified credentials & specialties
- ✓ Job search, applications, and status tracking
- ✓ Professional social network & messaging
- ✓ Digital timesheet submission
- ✓ Invoicing and payments
- ✓ News feed & career notifications

Web Portal — For Facilities & Recruiters

- ✓ Candidate discovery by specialty, license, and location
- ✓ Job posting & applicant pipeline management
- ✓ Auto-anonymized resume export for facility submission
- ✓ Timesheet review and approval workflows
- ✓ Messaging and offer coordination
- ✓ AI-generated summaries and insights

PRODUCT — MOBILE

Career in Your Pocket

From login to timesheet submission, the Locumfy mobile app covers every step of a healthcare professional's daily workflow.

PRODUCT — WEB PORTAL

Facility & Recruiter Command Center

Two purpose-built portals — one for facilities & recruiters, one for professionals — covering every step of the placement lifecycle.

 **FACILITY PORTAL** Profile · Candidates · My Jobs · Applications · Messaging · Timesheets

DATA INTELLIGENCE

AI-Powered Profile Engine

Locumfy's resume parsing and data curation engine automatically extracts, structures, and verifies candidate information from both private and government sources — creating the richest healthcare professional profiles in the industry.

Auto-Extracted Profile Data

Awards Certifications Education Employment History Internships Languages
Memberships Presentations Publications References Research Residencies
Skills Specialties State Licenses State Preferences Volunteer Work Titles

Government Data Integration

- ✓ NPI Database — automatic provider match & verification
- ✓ DEA Number extraction & association
- ✓ Medicare Number linkage
- ✓ State license validation & legal address verification

Smart Auto-Anonymization

Resumes are auto-formatted to the Jackson standard and anonymized for third-party facility submission — eliminating hours of manual reformatting per candidate per placement.

AI-Powered Social Graph

Machine-learned match scores project professional connections across shared employers, schools, specialties, and geographic preferences — bootstrapping a rich network from day one.

MARKET OPPORTUNITY

A \$45B+ Healthcare Staffing Market

\$45.5B

Existing Jackson Advantage

✓ Hundreds of thousands of resumes already in the system

✓

Established brands across every healthcare discipline:

LocumTenens.com Jackson & Coker Jackson Physician Search Jackson Nurse Professionals
Jackson Therapy Partners Jackson HealthPros Jackson PharmacyPros
Jackson Healthcare Gov. Services Avant Healthcare Professionals LRS Healthcare
Kirby Bates Associates Premier Anesthesia Parker Staffing Sullivan Healthcare Consulting
HWL Venn Workforce Optimization Care Logistics Kimedics Inlightened Continuous Care
USAntibiotics

✓ Pre-existing relationships with facilities and recruiters

✓ Proven technology for resume ingestion and parsing

Competitive Differentiation

✓ Only platform combining social graph + jobs + timesheets

✓ Government data auto-verification (NPI, DEA, Medicare)

✓ Cross-discipline coverage: nursing, therapy, physicians

✓ Built-in brand equity across multiple Jackson properties

✓ Retention hooks generic boards lack: credential wallet, license-expiry alerts, and timesheets bring clinicians back weekly — not just when job hunting

COMPETITIVE LANDSCAPE

No One Else Does All of This.

Every competitor owns one slice of the healthcare professional journey. Locumfy is the only platform that combines social networking, verified credentials, job placement, and timesheet billing in a single product — backed by a pre-seeded network.

Vivian Health

2.5M+ registered clinicians · Profitable, 50x revenue growth under IAC

\$60M raised — Thoma Bravo, 2022 · Job marketplace only

Clipboard Health

\$313.7M ARR · \$1.3B valuation · 20x growth 2021-2025

Profitable since 2022 · Per-diem shift fill · No professional network

ShiftMed

Open shift management · Enterprise workforce focus · No social graph

\$189M documented client savings (2025)

LinkedIn

1B+ users · Not healthcare-specific

No credential verification · No timesheets

OPERATIONAL INTELLIGENCE

Run the Whole Business From One Command Center.

Locumfy ships with a full executive analytics suite — an **eleven-view admin dashboard** that turns every action on the two-sided marketplace into real-time, board-ready insight. Growth, liquidity, engagement, supply quality, recruiter ROI, work volume, and revenue.

EXECUTIVE SUMMARY

ENGAGEMENT & USAGE

RECRUITER ACTIVITY

CANDIDATE SUPPLY

Total visibility

Is the marketplace growing, liquid, engaged, and healthy? Every KPI pairs a live value with a trend line and period-over-period delta.

Honest numbers

Every user metric separates **seeded** Jackson-imported accounts from **self-registered** ones, so real traction is never overstated.

De-risked

The instrumentation to prove traction — and to catch problems early — is already built and running, not a future roadmap cost.

Early warning

A "Needs Attention" strip auto-surfaces anomalies — applications down WoW, jobs aging unfilled, email-bounce spikes — before they cost money.

ELEVEN EXECUTIVE VIEWS • WAU/MAU STICKINESS • FILL RATE • TIME-TO-FILL • MODELED GMV • SEEDED→EARNED CONVERSION • RECRUITER FUNNEL • CREDENTIAL INVENTORY

TRACTION & UNFAIR ADVANTAGE

Two Data Layers, One Head Start.

Locumfy benefits from two distinct data assets: a research dataset used to train and validate the AI model, and the real Jackson Healthcare production database that will seed the live platform at launch.

JACKSON HEALTHCARE — PRODUCTION DATA (LIVE PLATFORM SEED)

250,000 (est)

REAL CANDIDATE RESUMES

Accumulated over 25 years across Jackson's 15+ staffing brands — nurses, physicians, therapists, locum tenens, allied health, and more.

21

STAFFING BRANDS CONTRIBUTING

PROJECTED NETWORK LINKS AT LAUNCH

Estimated professional connections across the full Jackson candidate database — applying the same AI link-scoring model validated on the training cohort.

AI MODEL TRAINING DATASET (RESEARCH PHASE — NOT PRODUCTION PROFILES)

90K+

TRAINING CANDIDATES

Sample dataset used to train and validate the AI parsing, link-scoring, and matching models.

660K+

PROJECTED NETWORK LINKS (TRAINING COHORT)

AI-scored professional connections projected from the training cohort — validates the link-scoring model before applying it to the full Jackson database.

"Much of the technology has been researched and prototyped. This allows Locumfy to get up and running much quicker than starting from the ideation stage."

BUSINESS MODEL

Multiple Revenue Streams

Facility SaaS

Monthly subscriptions for hospitals and staffing agencies to access candidate search, pipeline tools, and anonymous resume exports.

Job Posting & Ads

Premium job listings, sponsored placements, and targeted advertising to healthcare professionals by specialty and location.

Pro Memberships

Premium tiers for professionals — enhanced profile visibility, credential badges, priority recruiter contact, and analytics.

Data & Insights

Aggregated workforce intelligence reports and market data for healthcare systems, insurers, and government entities.

Roadmap: Payments — the Fintech Layer

Timesheets already flow through the platform. The next step closes the loop: approved timesheet → auto-generated invoice → same-week payout. A small take-rate on billed hours turns every completed shift into recurring transaction revenue — the model that made Clipboard Health a [\\$1.3B company](#) — while earnings dashboards and 1099 tax summaries lock in the contractor workforce.

PRICING & REVENUE

Priced to Scale — Two Sides, One Engine

Transparent, self-serve pricing on both sides of the marketplace: a low-friction subscription for professionals and tiered, usage-based plans for facilities.

For Healthcare Professionals

from **\$9.95** /mo

Candidate — Premium

Monthly subscription — unlimited employer access, expanded candidate contacts, timesheet management, credentialing storage, job-match notifications, and expanded profile visibility.

\$119.40 annual contract value per Premium member

For Facilities & Employers

Facility Plans

JOB POSTINGS
\$299-999/mo
1, 3, 5 & 10-posting packages up to an unlimited Company Package (\$999/mo).

FEATURED JOBS
\$50-300/mo
Boosted visibility — 1, 3 & 10 featured 60-day listings.

CV SEARCH
\$500-5,000
Resume database access — 1, 6 & 12-month plans.

Illustrative Revenue Build — Recurring ARR

Candidate subscriptions + facility plans

YEAR 1

\$3.6M

500 facilities · 5,000 Premium members
\$3.0M facility + \$0.6M candidate

YEAR 2

\$8.4M

1,200 facilities · 10,000 Premium members
\$7.2M facility + \$1.2M candidate

YEAR 3

\$16.8M

2,500 facilities · 15,000 Premium members
\$15.0M facility + \$1.8M candidate

Illustrative model based on published pricing. Assumes a ~250K Jackson resume seed converting to Premium at 2% / 4% / 6%, facility subscribers growing 500 → 1,200 → 2,500, and a blended facility ARPA of \$500/mo. The \$3M Year-2 ARR target in the funding plan is the conservative floor — full pricing adoption supports the upside shown here.

ROADMAP

From Prototype to Platform

Research and prototyping are complete. Investment accelerates through a phased go-to-market built on Jackson's existing infrastructure.

THE TEAM

Inside Knowledge. Outside Perspective.

Five years building Jackson Healthcare's platforms from the inside. Years more studying how the world's best aggregate networks — LinkedIn, Indeed, Jackson — are architected. Then building Locumfy from scratch, with the conviction of already knowing exactly what to build and why.

Christopher Davis

Creative Technologist & Developer-Strategist · Alpharetta, GA

nullref.io ↗

"Great engineering is not measured by how much code is written, but by how effectively complexity is reduced."

ENGINEERING PHILOSOPHY · [NULLREF.IO](https://nullref.io)

SIMPLICITY

Architectures easy to reason about, extend, and maintain as the platform scales across disciplines.

DECOUPLED SYSTEMS

Loosely coupled services — mobile, web, and API evolve independently without cascading risk.

AUTOMATION-FIRST

Generative OpenAPI contracts, custom scaffolding, and static analysis — keeping frontend and backend synchronized automatically.

AI AS MULTIPLIER

AI integrated thoughtfully into schema generation, data curation, and developer workflows — not as a shortcut but as engineering leverage.

The Unfair Founder Advantage

Most founders in this space are operators who can't build the product, or engineers who don't understand the market. Chris spent 5 years inside Jackson building recruiting infrastructure — and years more studying the platforms that prove the model. He brings a rare combination of product vision, architecture, and engineering execution.

Strategic Backer

Jackson Healthcare — the **#3 largest US healthcare staffing firm** at \$2.5B revenue ([SIA 2025](#)) and a [Forbes Top Private Company](#) — provides built-in distribution, candidate database, existing facility relationships, and brand credibility across every major healthcare discipline.

Roles We're Filling · Use of Investment

The engineering is done. Investment unlocks the team needed to take it to market and maintain quality at launch scale.

BUSINESS ANALYST

Requirements, workflows, and Jackson stakeholder alignment

PROJECT MANAGER

Launch coordination, milestones, and vendor management

QA ENGINEER

Test coverage, regression suites, and release validation

DEVOPS · PARTIAL

CI/CD pipelines, cloud infra, and deployment automation

THE ASK

Development • +1 Engineer • 6-10 Months

A prototype is built. We need an additional engineer for a focused 6-10 month development cycle to harden the platform, complete data pipelines, and launch to the first cohort of facilities and professionals. Your business rules and customizations are most of the work.

MONTHS 1 - 2

Foundation

Data migration, NPI pipeline hardening, profile seeding, auth & onboarding flows

MONTHS 3 - 4

Core Features

Job matching, timesheet billing, facility portal, auto-anonymized resume export

MONTHS 5 - 6

Launch & Activate

Opt-in campaign to existing candidates, facility beta onboarding, go-live

Use of Funds

- **Engineering & Product — 40%**
1 additional full-stack engineer × 6 months, mobile & DevOps
- **Data & AI — 25%**
Data pipelines, model training, NPI automation, anonymization
- **Sales & Marketing — 20%**
Facility acquisition, brand campaigns, user opt-in activation
- **Operations & Legal — 15%**
HIPAA compliance, data governance, customer success

What We're Building Toward

- ✓ Production launch by end of Month 6
- ✓ 100,000 activated professional profiles in Year 1
- ✓ 500+ facility subscribers in Year 1
- ✓ \$3M ARR target by end of Year 2
- ✓ Cross-discipline expansion: allied health, dental, behavioral

Locumfy augments — not replaces — the existing Jackson portfolio strategy. Each Jackson brand continues to own its vertical while Locumfy provides the unified engagement and talent layer above it.

LET'S BUILD TOGETHER

The Professional Network Healthcare Deserves.

Locumfy is the convergence of an existing talent database,
proven AI technology, and a clear market need —
delivering the first truly unified platform for medical
professionals and the facilities that need them.
